What is the 360 Collaborative Network?

Our network of service providers offers meaningful and impactful coordinated care. The 360 Collaborative Network helps families access services that support their economic mobility and overall well-being.

Together, we meaningfully address Social Determinants of Health in three main ways:

- **Unite Us’** shared technology platform allows for service connection for multiple needs
- Shared care coordination = shared accountability
- Shared network breaks down community “silos” and promotes inclusion of critical services

Some services offered by our current providers include:

- Housing
- Clothing & Household Goods
- Food
- Employment
- Substance Use
- Mental Health
